

## **OUR LITTLE IS MULTIPLIED IN THE HANDS OF JESUS**

Jesus multiplied the fish and the loaves of bread and fed the 5,000 but it wasn't until the disciples were distributing what they had that this miracle took place.

This Tuesday, May 5th, many of us around the world are coming together for a global day of giving as an emergency response to the unexpected need caused by COVID-19.

As some of you might know, May is the time when I normally return to the US to get some rest, family time and raise support. My flight back to the States has been rescheduled twice now and I'm not sure when I would be able to travel but while here, I would like to continue helping people affected by Covid-19 and show them that God cares for them even more so during this difficult time.

So far, 50 grocery bags, about 100 handmade face masks and home-made hand sanitizer have been distributed to the elderly, single parents and people who got laid-off due to pre-existing health conditions not only in my village but also on the nearby areas thanks to your generosity.

As this crisis continues and the economy keeps plummeting, parents are not able to provide food for their children, there is no work, food prices are going up, there is a shortage of Covid-19 supplies and there is NO assistance from the Mexican government.

**Our little is multiplied in the hands of Jesus and together we can witness a fish and loaves miracle.**

In HIS service,

--
